

HOW TO DRAFT THE SHADOW OF A CUBE WITH LOCAL (RAY) LIGHT

Rebecca B. Bennett

step 2
Establish the plan of the light (this is up to you)

HOW TO DRAFT THE SHADOW OF A CUBE WITH LOCAL (RAY) LIGHT

Rebecca B. Bennett

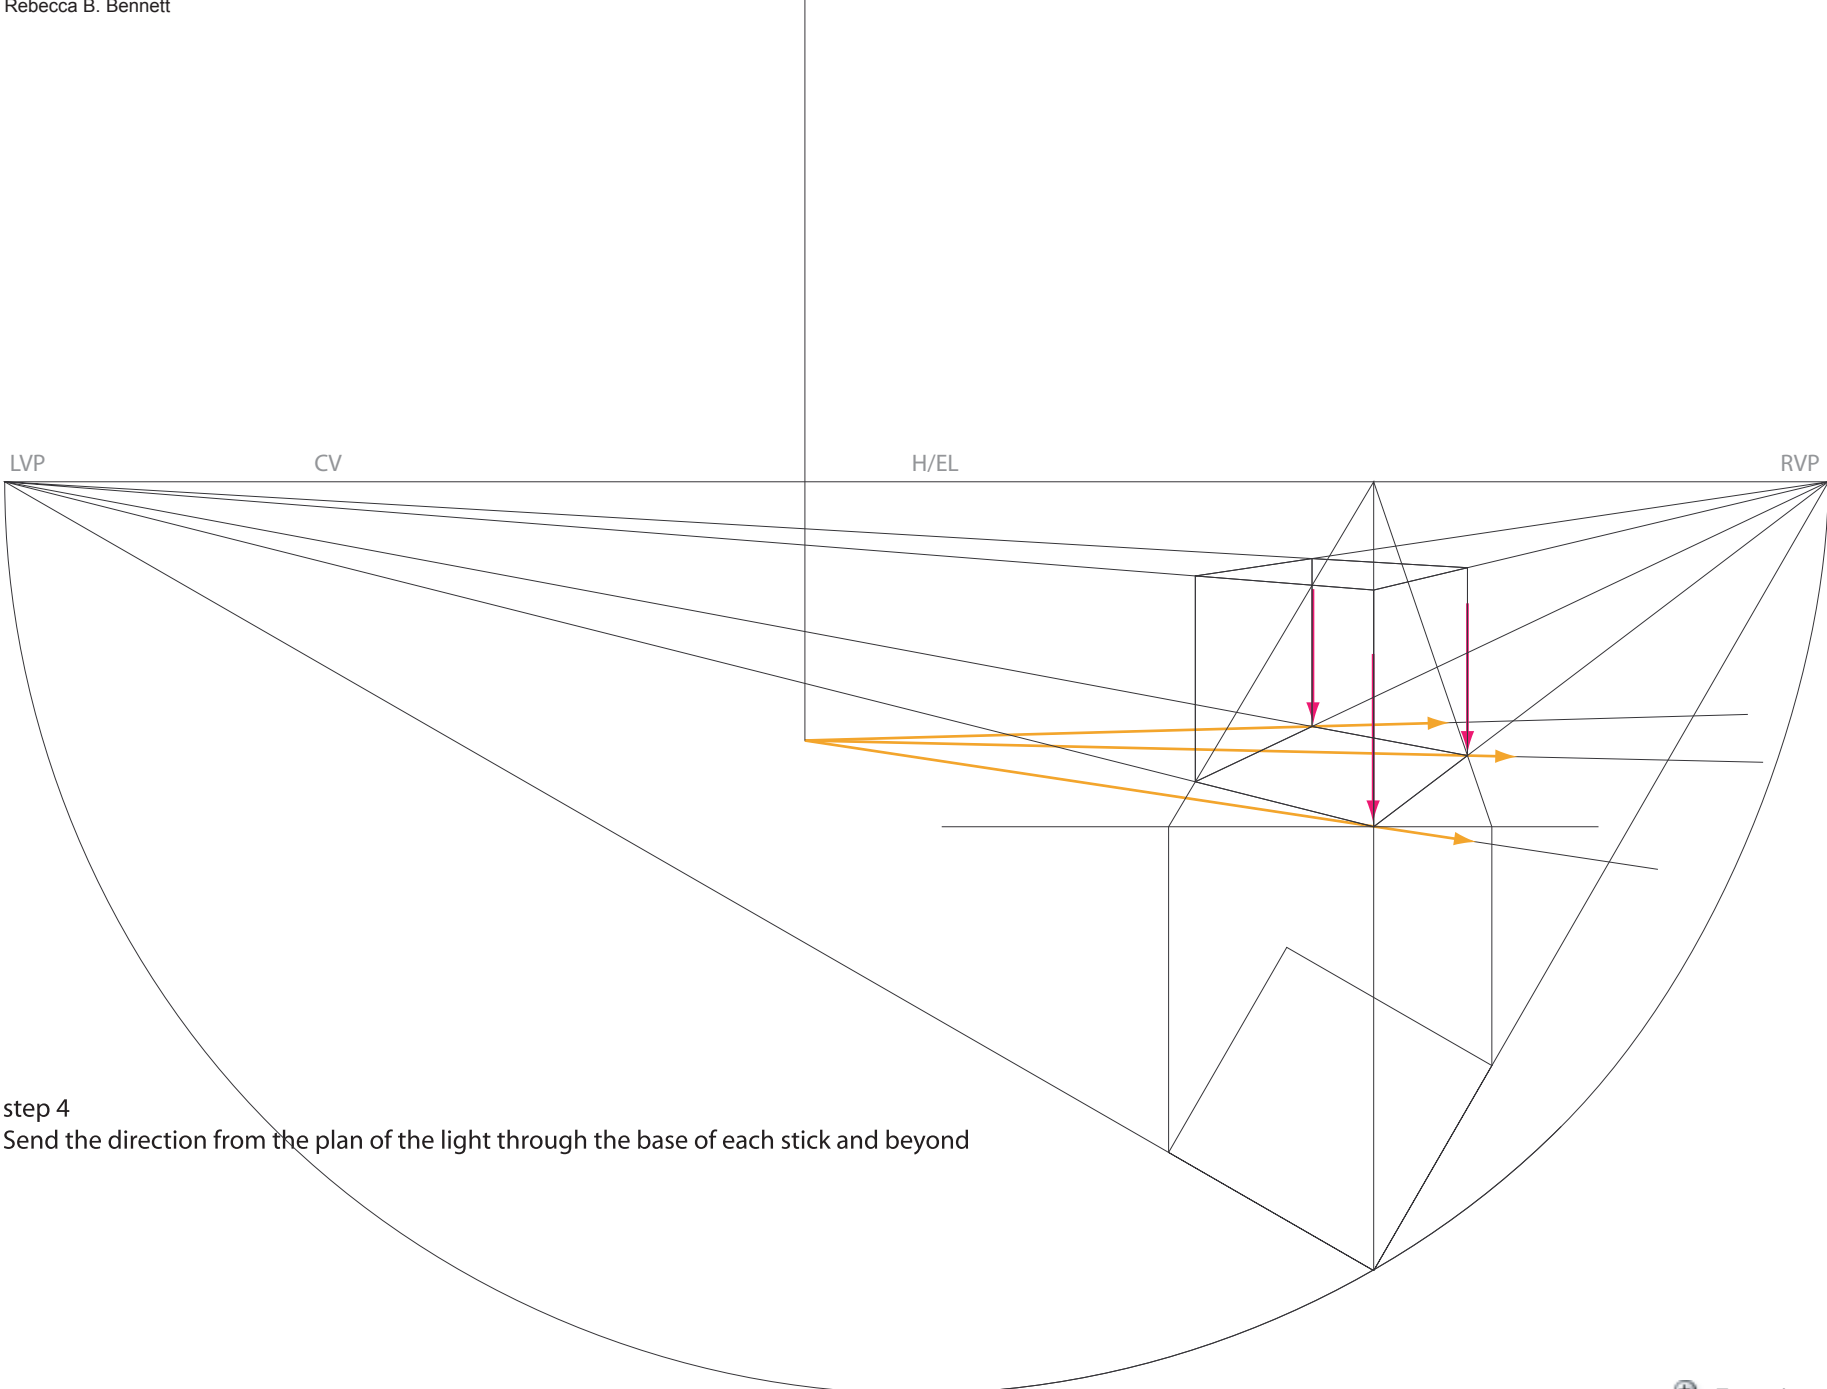

here is the height of the light

step 3
Establish the height of the light (directly over the plan)

HOW TO DRAFT THE SHADOW OF A CUBE WITH LOCAL (RAY) LIGHT

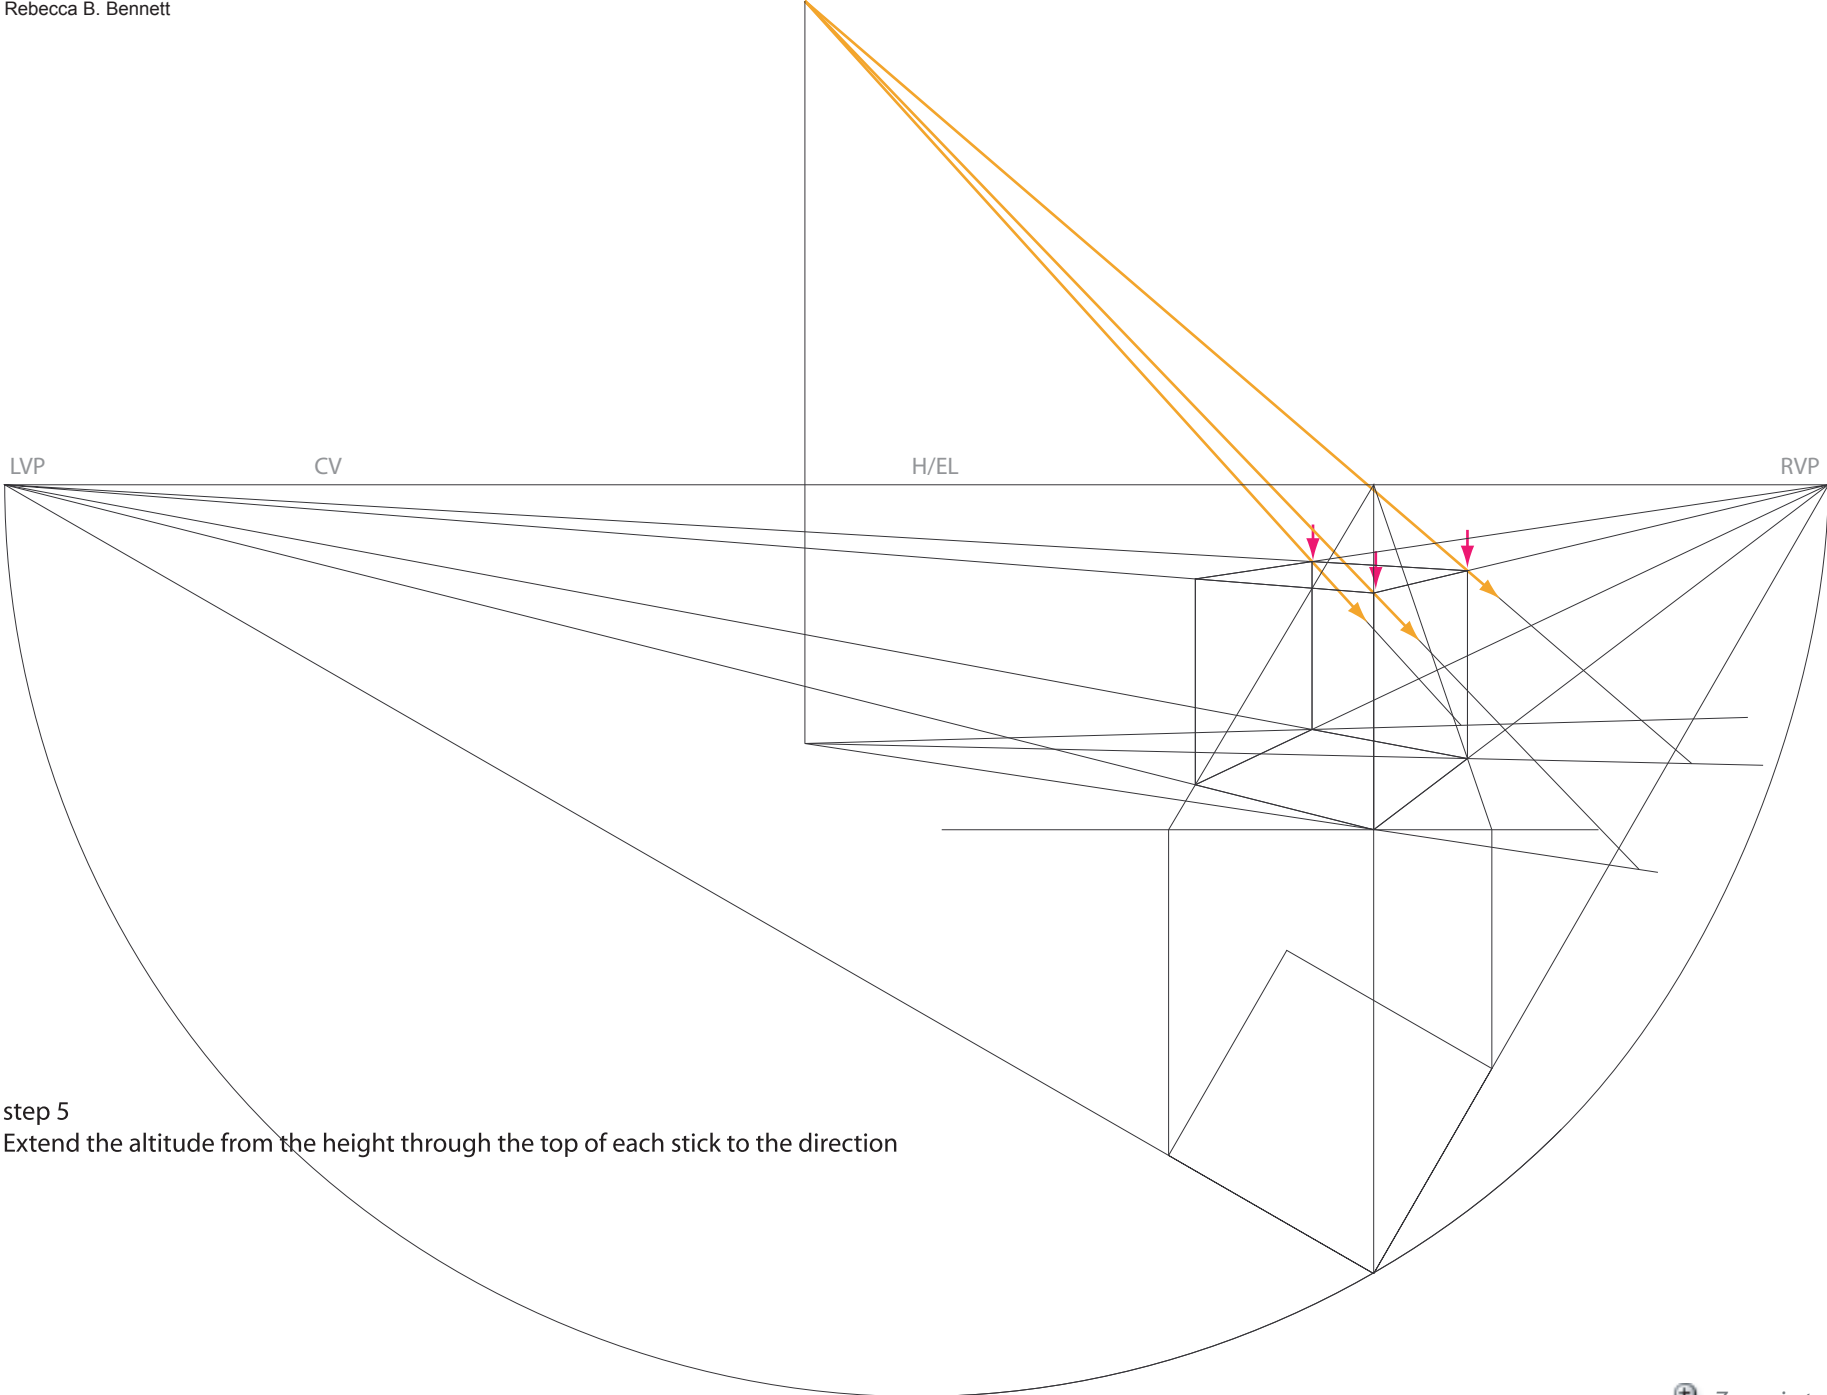

Rebecca B. Bennett

step 4
Send the direction from the plan of the light through the base of each stick and beyond

HOW TO DRAFT THE SHADOW OF A CUBE WITH LOCAL (RAY) LIGHT

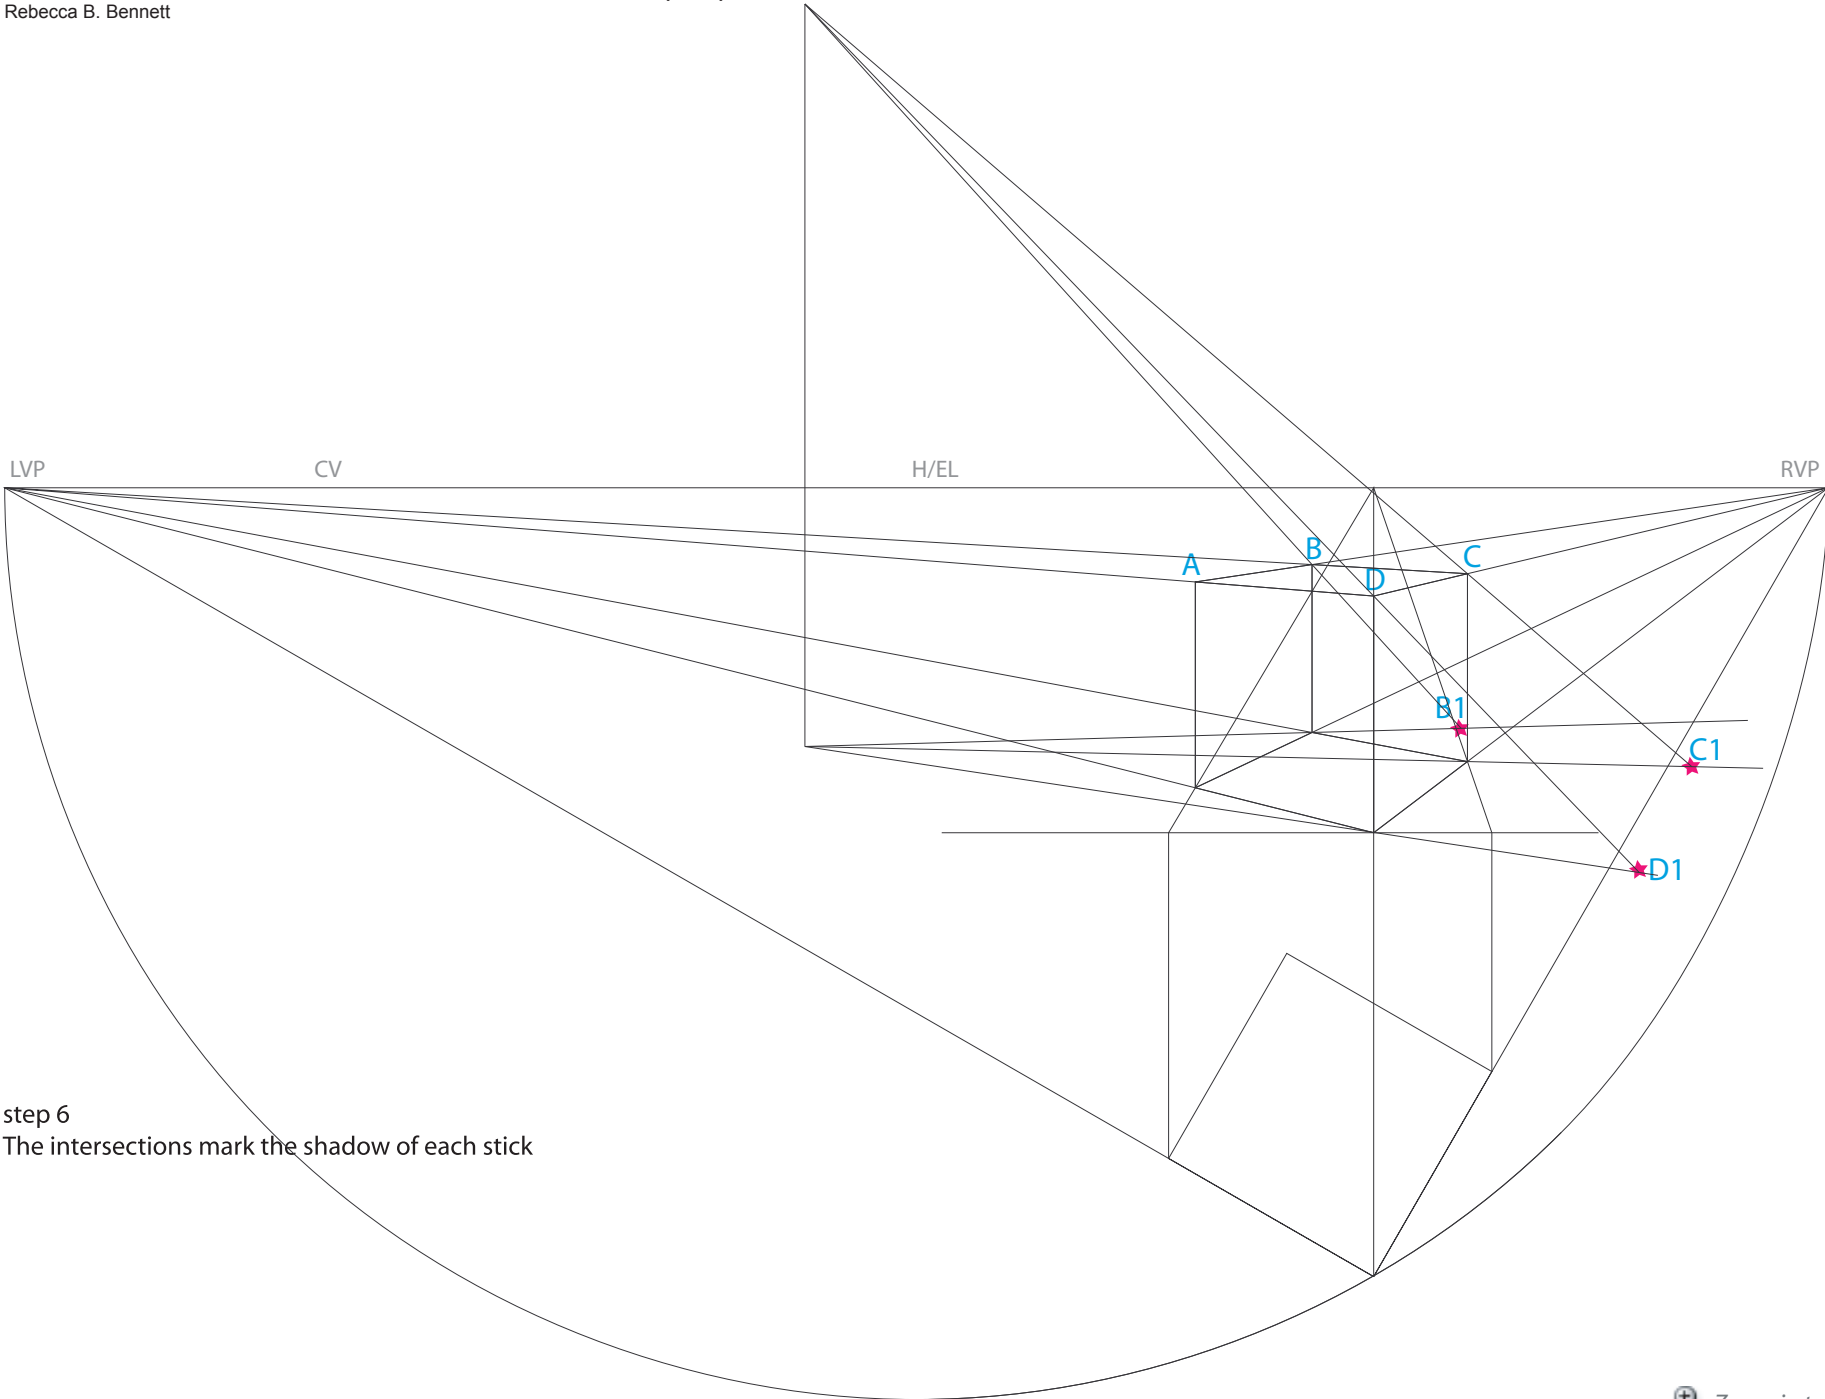

Rebecca B. Bennett

step 5
Extend the altitude from the height through the top of each stick to the direction

HOW TO DRAFT THE SHADOW OF A CUBE WITH LOCAL (RAY) LIGHT

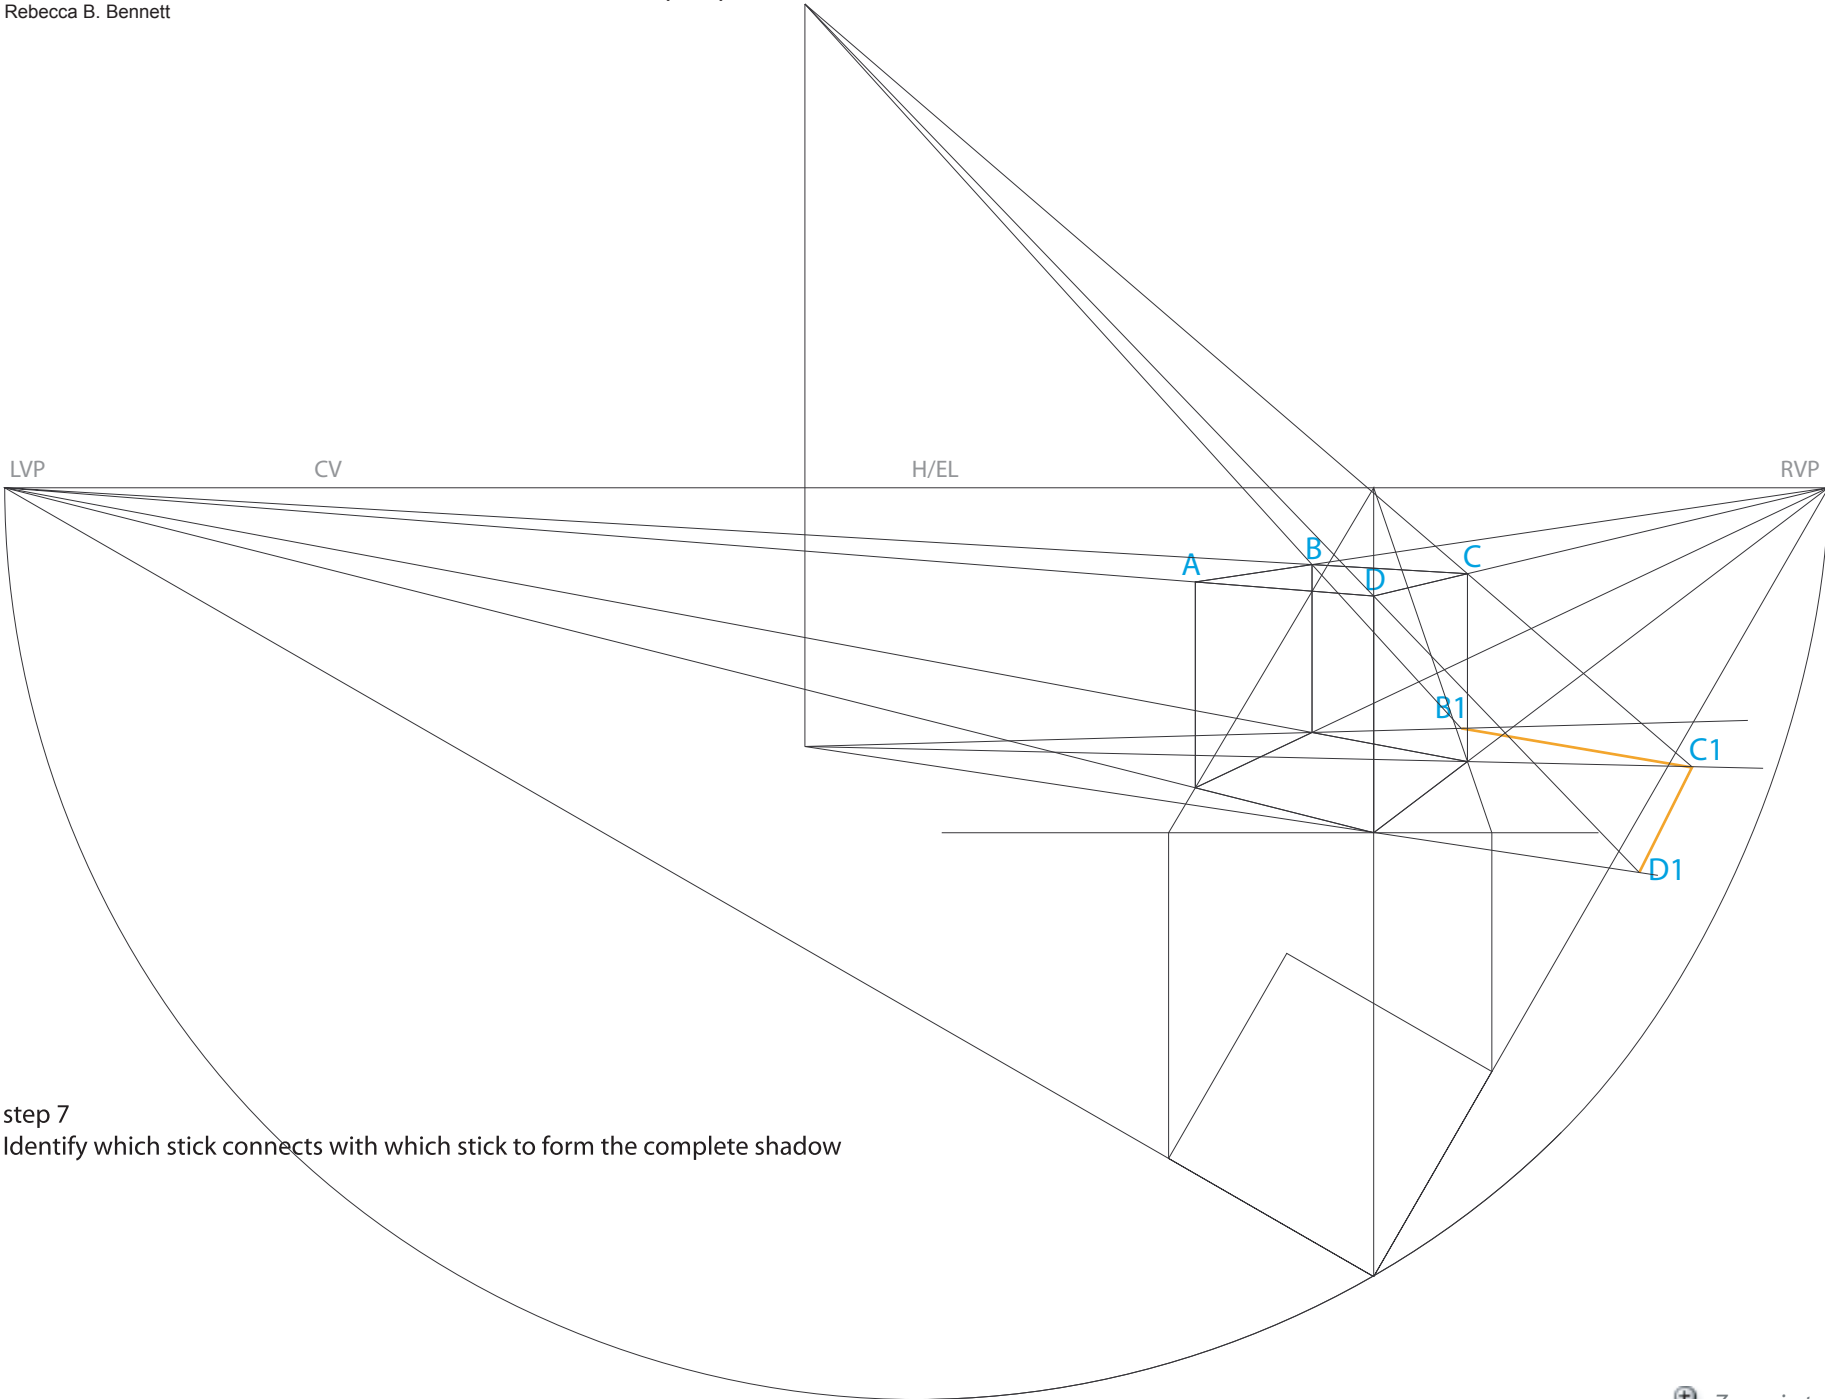

Rebecca B. Bennett

step 6
The intersections mark the shadow of each stick

HOW TO DRAFT THE SHADOW OF A CUBE WITH LOCAL (RAY) LIGHT

Rebecca B. Bennett

step 7
Identify which stick connects with which stick to form the complete shadow
