

Step 1:
Draw the stick.

height of the light

plan of the light ★

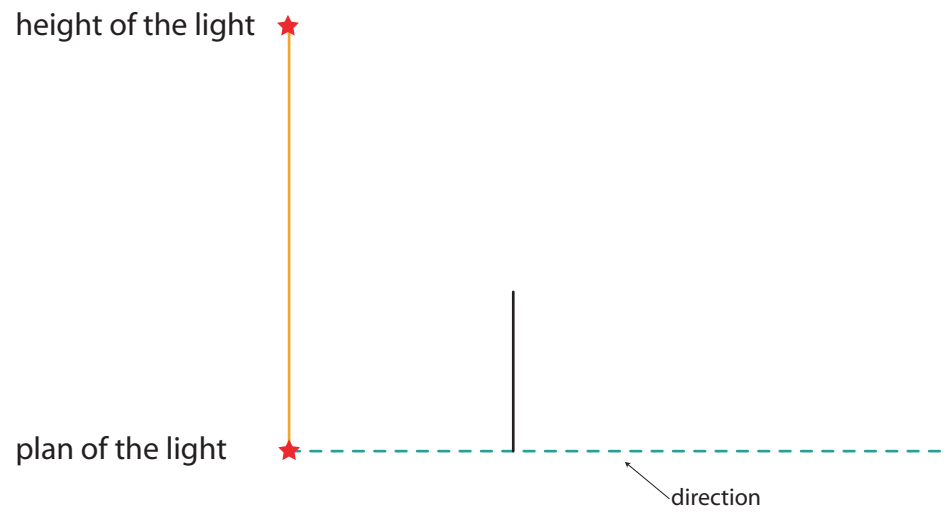

Step two:
Establish the plan of the light (this is up to you).

height of the light ★

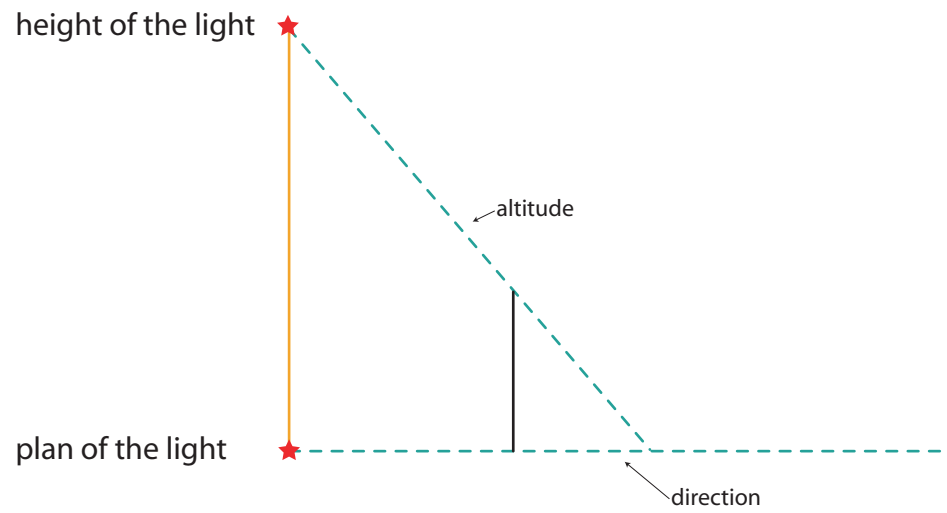

plan of the light ★

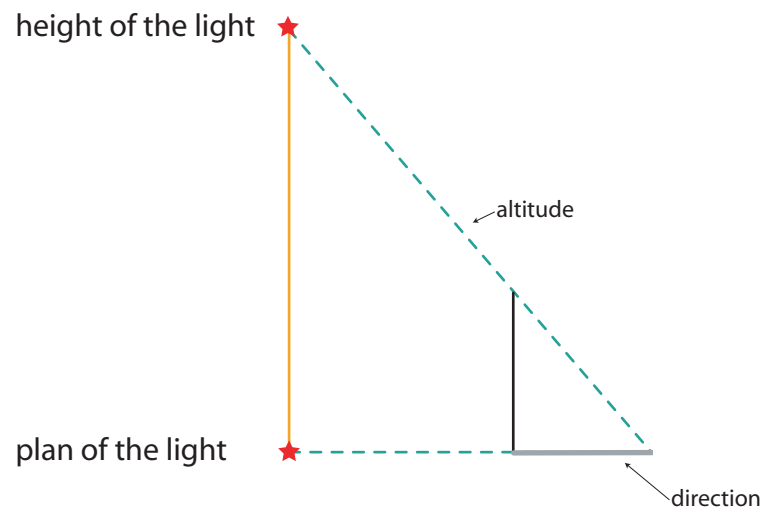

Step three:
Establish the height of the light (directly over the plan).

Step four:
Send the direction from the plan through the base of the stick and beyond.

Step five:
Extend the altitude from the height through the top of the stick to the direction.

Step six:
The intersection is the shadow.
